

Robertas Rudys

Backend Software Engineer | Business Central Migrations, .NET, APIs

Kaunas, Lithuania | sales@robertasrudys.com | [LinkedIn](#) | [GitHub](#)

Seeking an AL developer role, bringing C#/.NET migration-tool experience with Dynamics NAV and Business Central, alongside backend API and data-platform engineering.

Engineering experience

Software Engineer | Adform Lithuania | 2025 - 2026

- Delivered programmatic inventory API infrastructure that let media traders group up to **500** private marketplace deals into a single Deal Group, replacing manual line-item configuration for enterprise clients.

Software Engineer | Ignitis Grupės Paslaugų Centras | 2023 - 2024

- Accelerated Sagemcom smart-meter data fetching from **15** to **5** minutes, tripling telemetry resolution across **700,000+** active meters while keeping the pipeline stable under a **300%** payload increase.

Software Engineer | Super How | 2021 - 2022

- Built and deployed smart contracts and decentralized backend infrastructure for a Web3 research and development lab, contributing to **3** public tenders and tokenization protocols.

Software Engineer | Simplanova | 2020 - 2021

- Helped build a C#/.NET migration tool that automated up to **95%** of legacy Dynamics NAV code conversion from C/AL to Business Central AL and caught breaking changes early, reducing manual effort and rework for the migration team.

Software Engineer | Euromonitor International | 2018 - 2020

- Modernized legacy .NET functionality into web applications and REST APIs, and helped migrate a core data platform to a hybrid AWS/Azure environment serving **1,000+** global analysts.

Independent work

Founder | Indee | 2020 - Present

- **2026 - Present:** B2B sales, partnerships, client discovery, and mentoring aspiring founders among engineers.
- **2024 - 2025:** Hands-on study of AI-assisted software development and coding agents.
- **2022 - 2023:** Study of marketing, product management, and positioning alongside engineering.

Technical skills

- **Business Central migration tooling:** Dynamics NAV, C/AL-to-AL code conversion, early detection of breaking changes
- **Backend:** C# / .NET, ASP.NET Core, Entity Framework, REST and gRPC APIs, microservices
- **Data and cloud:** SQL Server, PostgreSQL, Azure, AWS, Docker, Kubernetes
- **Additional:** TypeScript, JavaScript, React, Angular, Solidity, GitLab CI/CD, GitHub CI/CD
